

## Short BIO

**Dr. Efstratios Kontopoulos** received his PhD in Artificial Intelligence from the Aristotle University of Thessaloniki in 2011. He also holds a BSc in Applied Mathematics from the same University (2003) and an MSc (Dist) in Computer Science from the University of Essex, UK (2004). He participated in several national and international research projects and published a number of international journal and conference proceedings papers. He currently works as a Research Associate at the Information Technologies Institute (ITI) of the Center for Research and Technology, Hellas (CERTH), where he serves as the lead researcher for H2020 project SUITCEYES, and as a task leader in various other H2020 projects. His research interests include Knowledge Representation and Reasoning, Semantic Technologies and Rule-based Systems.
